Summary

Fresh graduate Information Technology student with a strong interest in backend software engineering and full-stack web development. Experienced in developing an Enterprise RESTful APIs and real-time web applications using Go, JavaScript, Laravel, SQL, and modern web technologies. Built projects involving JWT authentication, WebSockets, RBAC, and computer vision, with a focus on clean architecture, scalable backend systems, and practical problem-solving. Comfortable working across the full development lifecycle, from designing APIs and database schemas to integrating frontend applications and deploying web services.

Technical Skills

- Languages: Go, Javascript, Python, PHP, Shell
- Web Technologies: React, Laravel, NodeJS (ExpressJS), Vite
- Backend Technologies: REST API, Websocket, JWT Authentication, RBAC, HTTP Protocol
- Database: MongoDB, PostgreSQL, MySQL, SQLite, Redis
- Tools: Git, Gitlab CI/CD, SSH, Linux (Arch Linux), Docker, AWS, Postman, CPanel

Experiences

Backend Engineer (Intern Maganghub) **PT Reasuransi Indonesia Utama (Persero)** **Sept 2026 – Current**

- Modernized AppVes, a legacy enterprise investment management system, by upgrading its Java platform from Java 7 to Java 25 and updating outdated libraries and dependencies.
- Supported the Oracle-to-PostgreSQL database migration, including schema mapping, data type mapping, and SQL query conversion.
- Developed REST API middleware independent service to integrate AppVes with the REINS core accounting system, reducing reliance on direct database-link connections.
- Implemented GitLab CI/CD automation to streamline build, testing, security scanning, and deployment workflows.
- Integrated Metabase into the modernized system to support data visualization and reporting through interactive dashboards.

Freelance Full Stack Web Developer **PT Desty Jaya Mandiri (destyjayamandiri.com)** **August 2026**

- Developed & Deployed company website for a Yogyakarta property company using Laravel, Vite.js, SQLite, and JavaScript.
- Built an Admin Dashboard for managing property listings (CRUD and image uploads).
- Designed the backend, database schema, RESTful APIs, and admin authentication.

Product Intern **PT Aino Teknologi** **Oct 2024 – Dec 2024**

- Developed an internal ERP system (Project Dashboard) using Laravel, PostgreSQL, Spatie Permission, and Laravel Excel.
- Designed and implemented Role-Based Access Control (RBAC) with Admin, Project Manager, and Finance roles.
- Designed and developed the Frontend, the Backend, the Database schema and the RESTful APIs.
- Contributed to improving internal project tracking and management.

Selected Projects

Kusmala – Interpreted Programming Language **Sept 2024 – Dec 2024**

Live Demo: https://ku-7a61eb073c154657985fb0a5e6bce6e6.ecs.ap-southeast-1.on.aws/

- Developed my own interpreted programming language with Indonesian-based syntax.
- Built lexer, parser, AST, and interpreter in Go.
- Designed language grammar and execution model from scratch.
- Built live/online kusmala playground for an easy online usage.

DMS AINO – Document Management System **Sept 2025 – Dec 2025**

Live Demo: dms-aino.onrender.com

- Developed a Enterprise web-based Document Management System for PT AINO Indonesia as part of Capstone Project in Uni.
- Role as the only programmer (full stack) in the group.
- Support Upload, View, Send, Sign, Audit, Download, Filtering and Delete document.
- Implemented sequential, parallel, and group-based digital signing workflows.
- Designed and developed the frontend (React), the backend (Node.js + Express) and the database (MongoDB + Mongoose).
- Implemented JWT authentication and RBAC authorization.
- Implemented RESTful API architecture in a monolithic system and managing the deployment.

Education

- **S1 in Information Technology,** Universitas Aisyiyah Yogyakarta (gpa 3.66). 2022 – 2026
  Thesis: Comparative Analysis Of YOLO Model Performance For Freshwater Fish Detection, JIPI journal, SINTA 3
